Subject: RE: Meeting with EPA to discuss status of Falcon RI/FS Project
Date: Tuesday, April 16, 2013 11:58:36 AM

Brian:

As we discussed this morning, the EA staff needed for the discussions on Falcon Refinery are not available on Wednesday or Thursday of next week. Several of us have schedule conflicts for one or both days. We'd like to propose to have the meeting on either the Wednesday (5/1) or Thursday (5/2) of the following week. Thursday is better for us but we can make either day work. Please let me know how this fits with your schedule. Let me know if you have any questions.

Thank you,
Bob Owens

Subject: Meeting with EPA to discuss status of Falcon RI/FS Project

Good Morning Bob

I would like to know if you and appropriate staff for EA would be available for meeting with EPA at office next week Wednesday or Thursday afternoon to discuss the Falcon RI/FS. Items that I would like to cover are:

1. EPA would like to discuss scheduling and prioritizing the site work. In particular, EPA wants to discuss how to best do the work in multiple sampling events.
2. EPA would like to discuss ideas for toxicity, bioavailability, and tissue sampling in lieu of additional media sampling for some of the AOCs, in particular AOC 3.
3. EPA would like to discuss access agreements and how to go about obtaining access to offsite properties.
4. EPA wants to discuss the data that the PRP has already submitted and how it can be incorporated into the new data that will be collected. EPA is interested in getting the data compiled into a more usable format to aid in decision making, sharing with the stakeholders and public, and producing a SLERA.

I will be out of the office for a medical appointment the rest of today and we will be in the office tomorrow.

Thanks
